## PROFESSIONAL SUMMARY

Full-Stack Software Engineer with hands-on experience building scalable web applications, RESTful APIs, and microservices. Proficient in Node.js, React, and Ruby on Rails with a strong foundation in software design and Agile development.

## EDUCATION

### Rajamangala University of Technology Lanna

Bachelor of Computer Engineering | First Class Honours

Graduated: Mar 2026

GPA: 3.87 / 4.0

Relevant Coursework : Data Structures, OOP, Database Systems, Software Design and Development

## PROJECTS

### Project Topic Submission Support System (Senior Project) | SvelteKit , Firebase , Tailwind

[Source Code](#)

- Built a 10-module academic platform for 4 user roles (Student, Instructor, Course Teacher, Admin), covering the full project lifecycle from topic submission and committee selection to exam scheduling and score calculation

### Valeria | E-commerce Image Platform | SvelteKit , Supabase , Redis

[Website](#)

- Reduced page load time by 74% (3.5s to 0.9s) through Redis caching, delivering faster experience across mobile and desktop
- Built complete shopping flow integrating Pixabay image search, persistent cart, and PromptPay QR payment

### Homestay Reservation System | React , Express , .NET Core , Postgresql , Docker

[Source Code](#)

- Architected 3 independent microservices across 2 user roles, exposing 19 REST API endpoints covering auth, room management, booking lifecycle, and mock payment
- Built complete booking flow with date-range availability check, overlap prevention, and booking status management containerized across 3 Docker services

## WORK EXPERIENCE

### Banana Coding Co., Ltd.

Software Engineer Intern | Angular , Ruby on Rails

Chiang Mai, Thailand

Nov 2025 - Mar 2026

- Researched and architected a custom MCP Server with 5 endpoints as part of an R&D initiative, unlocking LLM access to 3 enterprise systems with secure authentication for AI-driven workflows
- Drove API reliability to 95%+ pass rate by independently authoring comprehensive RSpec test suites across all endpoints
- Collaborated cross-functionally in an Agile environment, leveraging Git and Azure DevOps to deliver features iteratively

## TECHNICAL SKILLS

- Languages:** JavaScript (TypeScript), Ruby, PHP, SQL, HTML
- Frontend:** SvelteKit, React, Angular, Tailwind CSS
- Backend:** Node.js, Express.js, Ruby on Rails, .NET Core
- Database:** PostgreSQL, MySQL, Supabase, Firebase, Redis
- Cloud & DevOps:** Docker, Git, Azure DevOps

## LANGUAGE

Thai (Native)

English (Intermediate)
